***Authorisation for the board of directors to resolve on new issues of shares, convertibles or warrants (item 12)***

The board of directors proposes that the AGM resolves to authorise the board to decide, on one or several occasions during the period up to the next AGM to adopt a new issue of shares, warrants or convertibles in the company with or without deviation from the shareholders' preferential right. The authorization shall include the right to decide on issue against cash payment, capital contributed in kind or payment through set-off, and otherwise as conditions pursuant to Chapter 2, Section 5, second paragraph 1-3 and 5 of the Swedish Companies Act. Any issues made with deviation from the shareholders' preferential right shall be made on market terms, subject to an issue discount in line with prevailing market conditions if applicable.

The total number of shares that may be issued, *or* in the event of an issue of convertibles or warrants, any additional shares after conversion or exercise, pursuant to the authorisation in this paragraph shall, for resolutions taken without deviation from the shareholders' preferential rights, not be limited in any other way than by the limits for the share capital and number of shares, as set forth from time to time in the registered articles of association.

For resolutions made with deviation from shareholders' preferential rights, the total number of shares that may be issued, *or* in the event of an issue of convertibles or warrants, any additional shares after conversion or exercise, pursuant to the authorisation in this paragraph shall be limited to a dilution for existing shareholders of ten (10) percent.

The reason for the proposal and the possibility of deviation from the shareholders' preferential rights is to broaden and strengthen the ownership with strategic shareholders, procuring or facilitating the procurement of working capital, increasing the liquidity of the share, making acquisitions, or procuring or facilitating the procurement of capital for acquisitions.

At first hand, it should be directed to new shareholders with expertise in the field and with a strong financial position, but it may also be that the board, due to time and cost reasons, has come to the conclusion that a directed new issue is more suitable than a rights issue.

Resolution by the AGM in accordance with this proposal is only valid if the resolution of the AGM is supported by shareholders holding at least two-thirds of the votes casted as well as the shares represented at the AGM.

***The shareholders Mivac Development and GU Venture's proposed resolution regarding implementation of a long term incentive program for board members in the company (item 13)***

The board of directors shall be entitled to extend the time for subscription as well as the time for payment. #### *Dilution*

The full dilution, taking the proposal pursuant to item 15 above in consideration, amounts to approximately 2.1 percent.

#### *Majority requirement*

A valid resolution in accordance with the above requires that the resolution is supported by shareholders representing at least nine-tenths of the votes cast and the shares represented at the meeting.

#### ***Authorisation to make minor adjustments to the resolutions (item 15)***
